PROFESSIONAL SUMMARY

Data Science student and AI Solutions Developer with hands-on experience building RAG pipelines, LLM-powered voice agents, and end-to-end workflow automation systems. Proficient in Python, LangChain, n8n, vector databases, and cloud deployment with a proven track record of delivering 5-star rated client solutions. Strong competitive programming background with 500+ problems solved across LeetCode and Codeforces.

CORE COMPETENCIES

LLM Integration • Prompt Engineering • RAG Pipelines • LangChain • n8n Workflow Automation • Vector Databases (Pinecone) • API Orchestration • Python • SQL • Hugging Face • Streamlit • Data Pipelines & ETL • Docker • Git • Cloud Deployment • NLP

EXPERIENCE

AI Solutions Developer | Fiverr (Freelance)

May 2025 – Present

- Designed and deployed 5+ custom AI solutions including RAG chatbots, n8n automation workflows, and data pipelines, achieving a 5/5 client satisfaction rating across all engagements.
- Built end-to-end ML workflows integrating OpenAI, Pinecone, and third-party APIs for business automation, reducing client manual processing time by up to 80%.

Campus Ambassador | Devsinc

Jan 2025 – Present

- Led technical workshops on Python, SQL, and AI/ML fundamentals for 100+ students, resulting in a 40% increase in club participation and bridging the industry-academia knowledge gap.
- Collaborated with cross-functional teams to organize hands-on sessions covering data analytics, machine learning pipelines, and prompt engineering best practices.

PROJECTS

AI Voice Agent for Automated Recruiting | RAG, n8n, Pinecone, ElevenLabs, Twilio, OpenAI API

- Architected a webhook-driven AI voice agent integrating ElevenLabs conversational AI, Twilio telephony, and n8n orchestration to autonomously handle recruiter queries, schedule interviews via Google Calendar, and trigger Gmail notifications in real time.
- Implemented semantic resume retrieval using Pinecone vector search with OpenAI embeddings (1024-dim), enabling contextually accurate responses to recruiter questions with automated conversation logging to Google Sheets for analytics.

Intelligent Job Application Bot | n8n, LLMs, Web Automation, API Integration

- Engineered an end-to-end recruitment automation pipeline in n8n, integrating LinkedIn and JSearch APIs to aggregate and filter job leads, reducing manual sourcing time by 90%.
- Orchestrated a Google Sheets CRM with automated duplicate detection, status tracking, and logging, creating a closed-loop feedback system for application tracking and analytics.

EDUCATION

Bachelor of Science in Data Science – Punjab University, Lahore

2027

CERTIFICATIONS

- Machine & Deep Learning – Coursera (Andrew Ng)
- Linear Algebra for Machine Learning – Coursera
- Advanced SQL for Data Science – Coursera
- Tools for Data Science – IBM (Coursera)

ACHIEVEMENTS

- Solved 350+ LeetCode and 150+ Codeforces problems, demonstrating strong algorithmic and problem-solving proficiency.
- Maintained a 5/5 client satisfaction rating on Fiverr; skilled at translating complex AI concepts into clear, actionable deliverables for non-technical stakeholders.
